

Halo-Guard® FG-2

DESCRIPCION DEL PRODUCTO:

La grasa JAX Halo-Guard FG-2 puede satisfacer las demandas de lubricantes en casi cualquier aplicación de maquinaria para plantas de alimentos. Esto hace que JAX Halo-Guard FG-2 sea la grasa ideal para la lubricación general en toda la planta. Excelente resistencia al agua, excelente compatibilidad con otras grasas, excelente control de la corrosión y excelentes anti-desgaste y E.P. el rendimiento ayuda a simplificar el inventario de grasas y proporciona lo último en rendimiento de grasa para alimentos.

APLICACIONES:

La resistencia al agua es de particular importancia en aplicaciones con grasa grado alimenticio. Pocas aplicaciones industriales están sujetas al severo proceso y saneamiento del agua y la contaminación química inherente en las plantas modernas de alimentos y bebidas. JAX Halo-Guard FG-2 es una de las grasas de grado alimenticio más resistentes al agua en el mercado. Este producto se beneficia enormemente por la facilidad de aplicación de una presentación en aerosol. El práctico tubo de extensión facilita las aplicaciones difíciles de alcanzar.

USOS:

- Ruedas en carretas y bastidores.
- Herramientas circulares de corte y recorte.
- Cuchillas de afiladoras y cortadoras afiladas.
- Cadenas de movimiento lento que necesitan alta resistencia al agua.

DATOS TÉCNICOS:

Propelente:	Propano, butano
Punto de inflamación:	Extremadamente inflamable
Patrón de rociado:	Corriente media
Viscosidad:	95 @ 40 ° cSt (líquido base de grasa)
Textura:	Grasa gruesa húmeda típica
Apariencia:	Bronceado
Consistencia:	Pesado
Gravedad específica:	0.95 - 1.05 @ 20 ° C para Concentrado

EMBALAJE DE AEROSOL:

11 oz. peso neto de la latas de aerosol (12 por caja) - Parte # JAX213

EMPAQUETADO A GRANDEL:

14 oz. peso neto de los tubos de engrase (50 por caja) #HLG02-050

35 lbs cubo de Parte # HLG02-035

NSF International / Nonfood Compounds Registration Program

October 31, 2003

RE JAX HALO-GUARD FG-2 (AEROSOL)
Category Code: H1
NSF Registration No. 131601

Dear Patty Riek:

NSF has processed the application for Registration of **JAX HALO-GUARD FG-2 (AEROSOL)** to the *NSF Registration Guidelines for Proprietary Substances and Nonfood Compounds* (2003), which are available at www.nsf.org/usda. The NSF Nonfood Compounds Registration Program is a continuation of the USDA product approval and listing program, which is based on meeting regulatory requirements including FDA 21 CFR for appropriate use, ingredient and labeling.

This product is acceptable as a lubricant with incidental food contact (H1) for use in and around food processing areas. Such compounds may be used on food processing equipment as a protective anti-rust film, as a release agent on gaskets or seals of tank closures, and as a lubricant for machine parts and equipment in locations in which there is a potential exposure of the lubricated part to food. The amount used should be the minimum required to accomplish the desired technical effect on the equipment. If used as an anti-rust, the compound must be removed from the equipment surface by washing or wiping, as required to leave the surface effectively free of any substance which could be transferred to food being processed.

NSF Registration of this product is current when the NSF Registration Number, Category Code, and Registration Mark appear on the NSF-approved product label, and the registered product name is included in the current NSF White Book Listing of Nonfood Compounds at the NSF website (<http://www.nsf.org/usda>). The NSF Registration Mark can be downloaded from the NSF website, at http://www.nsf.org/mark/download_marks.html.

NSF Listing of all registered Nonfood compounds by NSF International is not an endorsement of those compounds, or of any performance or efficacy claims made by the manufacturer.

Registration status may be verified at any time via the NSF web site, at <http://www.nsf.org/usda>. Changes in formulation or label, without the prior written consent of NSF, will void registration, and will supersede the on-line listing.

Sincerely,

Carmen Grindatti
